

Name: _____

Grade: 2 _____

Humanities Worksheet-5

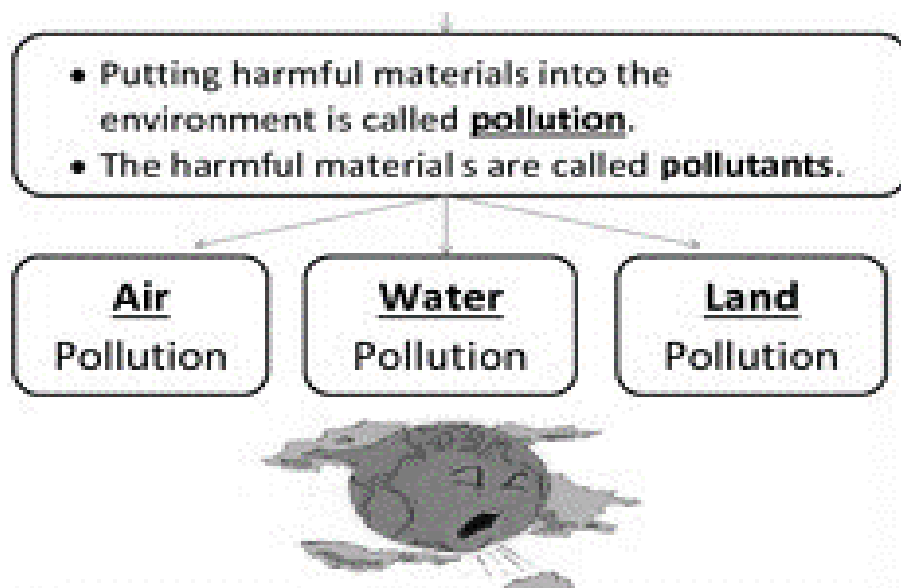

My Environment

The **environment** is defined as all physical surroundings on Earth. It includes every living and nonliving things. It also includes the air we breathe in, the water and the land. Plants and animals are part of it too.

Using the environment

Our environment gives us everything that we use. The food and water we consume comes from our environment. Also our clothes, homes and toys are made out of the materials from the environment.

Damage to our environment

We should not litter or make lot of noise as it can spoil the environment for other people. We need to use water and electricity wisely without wasting them. In short, we have to take care of our environment for a better living.
